Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 2, 5 and 6 are rejected under 35 U.S.C. 102(b) as being anticipated by Piette et al.

The drive device for a conveyor disclosed by Piette et al. includes all the claimed features and in particular includes: **(claims 1, 2)** a drive member 8, 16 with a plurality of engaging elements; a flexible conveying member having a plurality of counter elements 7 i.e. the bearings of the links 7 being the counter elements as broadly claimed; wherein the spacing of the engaging elements is greater than the spacing of the counter elements (column 2, lines 57-60); **(claim 5)** the drive member being a wheel 8, 16; and **(claim 6)** the conveying member being a flexible chain having links 7.

Allowable Subject Matter

3. Claims 3 and 4 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
4. The following is a statement of reasons for the indication of allowable subject matter: a drive device wherein the spacing of the engaging elements of a drive member

Art Unit: 3651

is larger than the spacing of counter elements of the conveying member including the unique feature of the 'ratio of the spacing being between 1.01 and 1.10' in combination with the rest of the claim language is not taught or fairly suggested by the prior art.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The following are cited to show the art with respect to drive devices wherein the spacing of the engaging elements of a drive member is larger than the spacing of counter elements of the conveying member: Thiele et al., Shiber, Clopton, and Conrad.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Gene O. Crawford whose telephone number is 703/305-9733. The examiner can normally be reached on Monday thru Thursday.
